## B.S. Degree in Business Management

The Bachelor of Science Degree in Business Management is designed to prepare adult learners for future managerial positions and to provide continuing education experiences for current managers. Students are encouraged to develop a sound philosophy, a strong sense of ethics, and effective problem-solving and decision-making skills.

The curriculum effectively balances management and administration courses with general education requirements thus affording students the opportunity to compete successfully in the global employment market for careers in business, government, and education and to fulfill the requirements for admission to graduate study. Students in the Business Management program are required to maintain a cumulative Grade Point Average of 2.000 or more in the major field and a minimum grade of "C" in all related courses as well as in English 101-102 and Communication 103.

Since the better academically prepared graduates are more successful in the job market, business management majors are strongly encouraged to maintain a cumulative Grade Point Average of at least 2.500. Students must not register under the Satisfactory/Unsatisfactory (S/U) grade option for graduation requirement courses. Completion of at least 58 semester hours is required prior to enrollment in 300/400 level business courses.
